3. **SAFETY** -Warning: The drum grab is designed for special usage. Please pay attention to the following to ensure proper operation.

- (1) The rated capacity of this drum grab is 360kg.
- (2) Never overload the forklift beyond its rated capacity.
- (3) It is designed for catching the drum. You must tighten the drum cover before grabbing it.
- (4) Contact the fork manufacturer to choose suitable fork feet before use.
- (5) Never lift a person or other goods.
- (6) Do not lift the drum for a long time.
- (7) Please check carefully before use. Repair it in time if it is damaged somewhere.
- (8) Do not modify this product without the permission of the manufacture.

4. INSTRUCTIONS

- (1) Installation: Put the grab on the flat ground; adjust the distance between two fork feet to fit the slot of the grab.
- (2) Tighten the spanner manually or with a tool, or button the eyebolt on the forklift with chains. Check the spanner regularly to make sure it is not loose.
- (3) Forklift lift the grab near the drum and grab the top brim of the drum, then the grab will hold the drum when forklift rise gradually, then you can move the drum.
- (4) The grab will separate automatically when the drum had been laid down.
- (5) When lifting two drums, try to get them close and ensure their weights are similar to keep their balance.
- (6) The grab is designed as a spring structure. It won't separate automatically even if losing the gravity when bumping.

5. MAINTENANCE

Please lubricate active parts regularly.
